DETAILED ACTION

Response to Amendment

1. In view of the amendment filed December 27, 2004, all rejections set forth in the Previous Office Action are withdrawn.

2. The indicated allowability of claims 8-15 is withdrawn. Anew rejection follows below.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 8-15 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for cancer cell lines NCI-H460, HCT-15, OVCAR-3, MCF-7, HT-29 and HCT-116, does not reasonably provide enablement for all types of cancer or for proliferative diseases. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. Applicants have shown, by way of examples, that the claimed compounds have *in vitro* activity for the above mention cancer cell lines. However, well known proliferative diseases such as atherosclerosis, psoriasis and inflammatory diseases such as sepsis and reumatoid arthritis are not known to use platinum complexes in their treatment regime. Further, even in the area of cancer treatment, most drugs do not treat all types of cancer, but rather, a selective few types. Note for example cis-platinum, which is used for the treatment of testicular, ovarian and bladder cancer. See WO 00/63219, cited by Applicants. Thus the issue is whether the *in vitro* data presented is commensurate in scope of what is claimed, particularly such areas as cancer

Art Unit: 1621

and proliferative diseases. It is the Examiner's position that the data presented is not commensurate with the scope of the claims. See *In re Buting*, 163 USPQ 689 (CCPA 1969) in which was found that the data on two types of cancer was not enabling for the claim all other types of cancers.

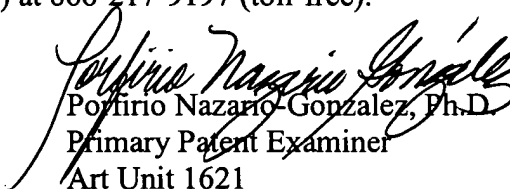

Allowable Subject Matter

5. Claims 1-7 are allowed.
